The Head,  
Department of Pathology & Lab. Medicine,  
All India Institute of Medical Sciences,  
Phulwarisharif,  
Patna – 801 505,  
BIHAR.

Dear Sir,

We are pleased to inform you that Borosil Glass Works Ltd. is the sole supplier of Rectangular Museum Jar manufactured from 3.3 Low Expansion Borosilicate Glass in India.

The advantage of Museum Jar manufactured from 3.3 Low Expansion Borosilicate Glass is, when specimen store with formaldehyde solution, there will not be any leaching of impurities and no reaction with glass.

Hence, the life of the specimen stored is longer and colour of the formaldehyde solution does not change for longer period of time.

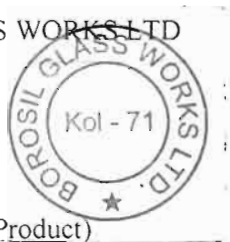

The Museum Jar made from Soda Lime Glass, the impurities leaches when it comes in contact with formaldehyde solution and due to chemical reaction the colour of the formaldehyde solution become yellow and degrades. Hence the life of the specimen stored is reduced when compared to Borosilicate Glass.

Thanking you,

Very truly yours,  
For BOROSIL GLASS WORKS LTD

Rahul Chakraborty  
Zonal Manager  
(Science & Industrial Product)

Regd. Office : Khanna Construction House, 44, Dr. R.G. Thadani Marg, Worli, Mumbai – 400 018

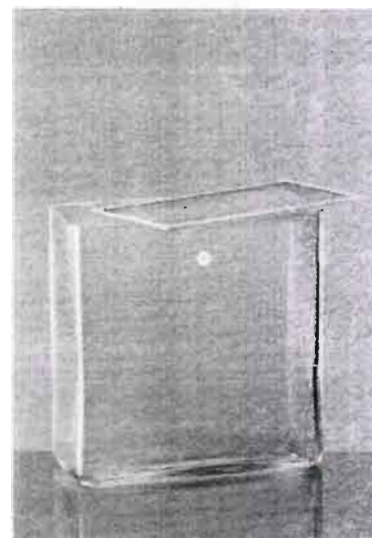

Jars

The cover of Museum Jar is provided with a small orifice for easy filling of the preservative without unsealing the lid. The excellent resistance to chemical attack and good optical clarity of Borosil® brand jars gives them a clear advantage over others.

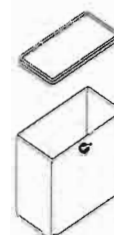

## Jars

### 6910-Jars, Rectangular, Museum, With Cover, 3.3 Borosilicate glass

- Made from borosilicate glass
- Specially blown to give sturdiness and long life
