1. ENTreview – smartphone enabled digital otoscope with network-based field screening solution

ENTreview is a CE certified equipment consisting of following core components: an otoscope, a smartphone, a light source for the otoscope, and a mobile data SIM card. A telemedicine application is loaded onto the device to record an entire case, including images of the ear and provisional diagnosis. The completed case is then transmitted to a cloud server over 3G, which can be accessed by the ENT surgeon. Key features of ENTreview:

- a. 3G/WiFi network connectivity
- b. Enables Field Otology and Audiometry examination
- c. Rechargeable batteries for prolonged usage
- d. Portable and robust design for field use
